Fireplace (if applicable):

Press the up button with the power button at the same time, you will hear a click

The pilot light will light in roughly 45 seconds, the flame will follow shortly after

Use the up and down button to control the flames

Press the select button to control the temperature and the fan

Press the power button to turn off

Refrigerator/Freezer: (If applicable, 1+ Bedroom)

Open the refrigerator door and make sure that the "Vacation" mode is not on.

To turn on the ice maker, look at the screen at the top of the refrigerator and select the "Ice" button.

The word "Ice" will appear on the screen if it is on.

Dishwasher:

Pull open the handle and press the “On” button.

Add dish detergent and select the cycle you would like plus an extra options.

Press the “Start” button and close the dishwasher, you will hear beeping and the cycle will begin.

Washer and Dryer:

The washer is on bottom. Open by pulling the door either to the right or the left. Add clothes and laundry detergent and close door. Press the “Power” button on the right (top) to turn on. Select the desired cycle, only pressing the center button if you wish to have extra power. Hold the “Play/Pause” button to start. Once done, move clothes to dryer and press the “Power” button to turn off.

The dryer is on top. Open by pulling the door either to the right or the left. Add clothes and dryer sheet and close door. Press the “Power” button on the right (top) to turn on. Select the desired cycle, only pressing the center button if you wish to have extra power. Hold the “Play/Pause” button to start. Once done, remove clothes and press the “Power” button to turn off.

HVAC:

DO NOT set heating and cooling to AUTO on the main thermostat. The fan can be set to auto.

On the main thermostat, use the dial on the right of the thermostat to set the system to your desired temperature.

Press the top of the dial near the blue triangle to select, and the bottom of the dial near the red triangle to exit.

All Thermostats **MUST** be set to the same mode:

For Heating:

Turn master thermostat to “Heat”

Make sure the rest of the thermostats are also set to “Heat”

Set the master thermostat to the desired temperature

Set the remaining thermostats to desired temperature

For Cooling:

Turn the master thermostat to “Cool”

Make sure that the rest of the thermostats are also set to “Cool”

Set the master thermostat to the desired temperature

Set the remaining thermostats to desired temperature
